June 21, 2013

Mr. Doug Berry
Viasystems Denver Inc.
10570 Bradford Road
Littleton, CO 80127

Dear Mr. Berry:

RE: Company Name Change; FSC 5998; CAGE Code 75815; CN039954, VQE-13-026603

DLA Land and Maritime has received correspondence informing this office of the name change for your facility. The correspondence states that there were no major changes to the certified QM plan for MIL-PRF-31032 or TRB membership. The existing name as listed on the QPL/QML, DDi Denver Corp (Plant Location: 10570 Bradford Road, Littleton, CO) will be changed to Viasystems Denver, Inc. (same plant locations). At this time, it is understood that quality system, equipment and personnel will remain generally unchanged. Any major changes to the certified QM Plan shall be concurrently forwarded to DLA Land and Maritime-VQ upon TRB approval of the changes.

Please ensure that your CAGE Code is registered with both the SAM and BINCS databases. Discrepancies may cause a manufacturer to not be listed on the qualified products database (QPD).
NOTE: This had not been completed as of June 20, 2013.

The following DLA Land and Maritime letters shall be considered transferred:

Latest Notice of QML Certification	VQE-12-024947
Laboratory Suitability	VQE-12-024948
Latest Notice of QML Qualifications	VQ (VQE-13-026429) GF capabilities, VQ (VQE-13-026429) GI capabilities

These changes will be reflected on the next publication of the Qualified Products List QPL-55110 and the Qualified Manufacturer List, QML-31032. Any future changes shall be reported to DLA Land and Maritime-VQE for consideration.

Should you have questions regarding this letter, please contact Mr. Lowell Sherman at vqe.ls@dla.mil or 614-692-0627.

Sincerely,

for RAYMOND L. KOLONCHUK
Chief
Electronic Devices Branch
